K-LOVE, 94.3 FM in the Chicago area

K-LOVE provides me and my family with the type of music we want to hear, in a COMMERCIAL-FREE format. This combination of a steady play of today's contemporary Christian music without a lot of talk, and especially without interruptive, even offensive commercials, is not found on any other station in this area. Without K-LOVE, in order to listen to today's Christian music without commercials, I personally would have to invest in countless music CD's. K-LOVE promotes family values in its programming. My children enjoy K-LOVE and I don't have to monitor what they are hearing. Even the news is reported in a safe manner (without graphic descriptions of events). Through several years of listening, I have found the K-LOVE announcers and DJ's to be careful about their choice of words used on the air.

K-LOVE provides free services such as announcements of events relative to me and my local community. Additionally, this station offers to all listeners, 24-hour access to staff members who can provide help through means such as counseling or prayer support. It is in the positive interest of this community that K-LOVE continues broadcasting to the Chicago area on 94.3 FM. Displacing K-LOVE with another broadcaster would risk losing a means to provide me, my family, and this area with positive, upbeat Christian music in a commercial-free environment; and a safe, family friendly alternative.
